

The Mission of the Global Virology, Vaccine R & D 2021 Congress

It mainly focuses on the study of virus and its vaccine R&D. We hope that this global congress will give all the researchers, academicians and students a great opportunity to exchange and connect with the international experts around the world.

1. Get feedback on an early version of your latest research.
2. Get to know leaders in your field.
3. Hear about the latest research findings.
4. Engage in high-level debates and refine your ideas
5. Greater Focus & Networking Opportunities
6. Invest In Yourself
7. Discuss about your business with global audience

Fantastic conference – thanks so much for all your thoughtful and effective organization.” The skill-building track was excellent, and I took advantage of both days offering evaluator info and was satisfied so informative and knowledgeable. I will keep eye on this conference and attend it again and again. Deeply thanks for the team who work in this a wonderful conference.

Firstly, I want to appreciate MEC Global Events for organizing an educative meeting like this. The program is one of its kind, so educative and full of life. All the topics talks was made on are really eyes opener. Since the program kick off the first day, have learnt alot from all the speakers. Is really a meeting i personally acquired more knowledge. I am really hoping and looking for more opportunities like this from MEC Global Events in the future

Testimonial

Very glad I came across *Global Meeting on Nursing Science and Health Care conference*. I learned several ideas and met new friends and potential colleagues. I like the opportunity for interaction during the session. As a graduate student, conference gave me a chance to communicate with a lot of persons with rich knowledge and skills in nursing field, as well as, great content, new and old experts, for really good conversations. Thanks.
