MARKET REPORT

HEART CONGRESS 2020

Total sales for cardiovascular disease drugs will grow steadily over the next six years, from almost \$47 billion in 2018 to over \$70 billion in 2024.

The global cardiovascular therapeutics market continues to see rapid innovation with new drugs and devices entering the market.

Asia-Pacific regional segment of the cardiovascular device market has registered a very high CAGR. This can be attributed the rising population, especially the geriatric, adoption of unhealthy western lifestyle and heavy investments in health sector.

Among the devices for Diagnostic and Monitoring, the ECG holds at least 40% of the share, this can be attributed to the augmented capacities of the new generation electrocardiograms.

The market being consolidated and restricted to a few very strong key players, the market situation is very difficult for the entrants especially for entrants to get tax cuts and product approvals.

BERLIN ATTRACTIONS

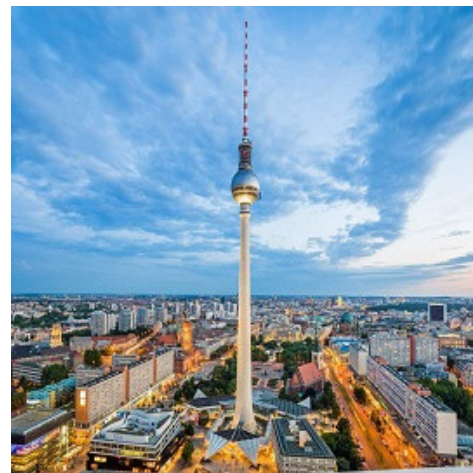

HEART CONGRESS 2020

Rotes Rathaus

Sanssouci Palace

Zoo Berlin

Berlin, Germany's capital, dates to the 13th century. Reminders of the city's turbulent 20th-century history include its Holocaust memorial and the Berlin Wall's graffitied remains. Divided during the Cold War, its 18th-century Brandenburg Gate has become a symbol of reunification. The city's also known for its art scene and modern landmarks like the gold-colored, swoop-roofed Berliner Philharmonie, built in 1963.
